

How to find us

Publishing and Graphic Services is housed in Carolina Rediviva with its own entrance on the north facing wall. You are welcome to use this door when visiting us. This way you won't need to leave your outdoor clothes in reception.

Publishing & Graphic Services

Publishing and Graphic Services

Publishing and Graphic Services is part of Uppsala University Library and have two primary functions:

- Publishing doctoral theses and monographs
- Graphic Services

The department consists of 5 people and is housed in Uppsala University Library, Carolina Rediviva. Working closely with our customers we aim to get the best product for the best price. We have negotiated agreements with printing houses and have an extensive network which ensures that we can take on most jobs. No job is too big or too small.

Publishing

We help approximately 350 doctoral students each year to publish their theses in printed and electronic form.

We deal with the whole publishing process for comprehensive summaries and monographical theses which are published in the University's Acta series. We are also responsible for departmental series and all authors are welcome to contact us concerning publishing issues.

We assist in optimizing PDF files for printing and electronic publishing (for example in DiVA). We take care of all contacts with the printing houses. For prices for additional services, e.g. typesetting, image enhancement etc, see the price list on our web page.

On our web page you can also find:

- A checklist for doctoral students
- Templates and PDF files
- Courses on thesis templates and publishing
- Information about posting your thesis
- Questions and answers

Graphic Services

Graphic Services helps departments and other parts of the university to produce printed items, from the first idea to the finished product. You can come to us with both big and small jobs. We will help you with design, advice, questions about cost estimates and contacting printing houses. We make sure that the whole production is cost effective and professional. Our productions conform to the University's graphic profile.

There is a great deal of experience in design work at Graphic Services. We are a highly qualified team with a broad background within both design and graphic techniques. We have an extensive network which ensures that our work maintains a high standard. We work closely with the University Printers and other printers that produce quality printed items. Our close cooperation with the Photographic Services at the University Library also ensures professionally produced pictorial material. As far as books are concerned we can help you not only with traditional, but also with electronic publishing.
